

ABOUT THE ECO R HES

The ECO R Hybrid Energy System (HES) is part of GS Battery (U.S.A.) Inc.'s series of customer sited energy storage systems. The ECO R HES is a fully integrated system and comes preconfigured with the renewable energy connections, electrical wiring, power conversion electronics and batteries needed to rapidly deploy a complete energy storage system.

The unit provides a quick, cost effective and easy installation. Installation only requires connection to:

- Renewable energy sources
- Grid power connection (if desired)
- Generator power connection (if desired)
- AC loads connections

The ECO R HES is feature rich and user friendly system that saves money at installation and for years into the future.
